STARCRAFT
AR-ONE

A durable, entry-level camper that is value-priced, the AR-ONE is towable by most SUVs and minivans. The 2015 AR-ONE features bolder new graphics, a 2-year limited warranty and new touches such as ball bearing drawer guides and heated mattress pads. The AR-ONE MAXX provides more living space while five floorplans offer additional sleeping accommodations in double or single bunk beds. Packing a lot into a small, lightweight package, the AR-ONE and AR-ONE MAXX feature standard amenities to ensure an enjoyable camping experience – pure and simple.

30BHU

UNLOADED VEHICLE WEIGHT (UVW): Sometimes referred to as "Dry Weight," UVW means the typical weight of this trailer as built at the factory. The UVW, as used in product literature and other promotional materials, does not include cargo, fresh water, propane, options or dealer-installed accessories. The weights of certain options and/or option packages are not included in the UVW listed above.

GROSS VEHICLE WEIGHT RATING (GVWR): GVWR means the maximum permissible weight of the trailer, including the UVW plus passengers, personal items, all cargo, fluids, options, and dealer-installed accessories. The GVWR is equal to or greater than the sum of the UVW and the CCC.

CARGO CARRYING CAPACITY (CCC): CCC means the maximum weight of all passengers, personal items, food, fresh water, propane, tools, other cargo and dealer-installed accessories that can be carried by the trailer. CCC is equal to or less than GVWR minus UVW. The addition of options will decrease the CCC.

HITCH WEIGHT (HW): The hitch weight, as used in product literature and other promotional materials, does not include cargo, fresh water, propane gas, options or dealer-installed accessories. The addition of these types of items will either add to or subtract from the stated hitch weight. It is important for your safety and enjoyment that your tow vehicle be adequately sized and equipped to tow and handle the GVWR of the RV you select. Review weights and rating of your tow vehicle and consult a competent advisor for questions or advice. Whether you are new to RVing or a veteran, get a feel for the performance of your tow vehicle and the RV together before heading out on the roadways. When you tow an RV, you must drive differently than you do when driving a single vehicle. Practice hooking up, driving, backing up and braking in a safe environment or seek out professional instruction. Starcraft affixes a weight label to each RV which lists weight information for that vehicle. See specification chart above.

STANDARDS AND OPTIONS

STANDARD CONSTRUCTION EQUIPMENT

5/8" tongue-and-groove plywood main floor decking (MAXX)
Cable-support bunk-end system (1,100-lb. capacity) (15RB, 18FB)
Fully decked roof with 3/8" decking

PEACE OF MIND - PURE AND SIMPLE

Starcraft is proud to back their products with one of the best and most comprehensive warranty programs in the industry. Starcraft is determined to make every camping experience enjoyable by offering peace of mind - pure and simple. See back for details.

50 YEARS OF AFFORDABLE DURABILITY

Starcraft builds a variety of RVs, from the entry-level Starflyer camping trailer to our premium-rated Travel Star travel trailer. Throughout each unit, it is evident to customers that our Amish craftsmanship and attention to detail are what make Starcraft products unique and family-friendly.

Staying true to our pursuit of affordability and durability, we use the highest-quality materials available, state-of-the-art production techniques and time-tested design. We put all of our time and effort into making a quality camper at an affordable price.

What started out five decades ago as an idea to provide families with a way to reconnect and enjoy the great outdoors has grown into a company that takes great pride in saying that Starcraft means Camping - Pure and Simple.

DURABLE CONSTRUCTION

AR-ONE features durable construction, including 5/8" main floor decking, Poly Flex one-piece underbelly covering, wooden wall studs on 16" centers, and .024" aluminum exterior siding. Crowned roof trusses, 3/8" roof decking and a one-piece seamless rubber roof offer durability and help prevent leaking. With a 7-year tent warranty, our mold resistant, double-stitched AquaShield Aqualon material doesn't stretch, shrink or crack, providing long-lasting durability even when it's up against Mother Nature.

PEACE OF MIND - PURE AND SIMPLE

The Starcraft warranty is a manufacturer's limited warranty. Each Starcraft is warranted to the original purchaser for twenty-four (24) months from the original date of purchase against defects in materials and workmanship. Starcraft's limited warranty is not transferable. For a copy of the limited warranty with full terms and conditions, ask your local Starcraft dealer.

Starcraft -vs- the Competition

MAGNUMROOF SYSTEM

Our Roof is 50% Stronger!

SCREWED CONSTRUCTION

We screw down 3/8" roof decking at each seam vs. our competitors who use staples.

OVERSIZED NAIL PLATES

Our oversized nail plate joint fasteners are more secure than the smaller ones used by our competitors.

2" X 2" VERTICAL WOOD STUDS

Our strategically placed 2" x 2" vertical studs maximize load capacity compared to 1" aluminum piece on inferior roofs.

7" HEADER BEAM

7" header beams between the roof and slideout openings comply with load-bearing beam standards for home construction.

4,500 LBS. ON A STARCRAFT ROOF

The MagnumRoof System withstands 4,500 lbs., while the others crumble.

Scan to learn all the ways that the MagnumRoof System by Starcraft is superior.
